PROFESSIONAL SUMMARY

Senior Full-Stack Engineer and Team Lead with 6+ years building high-performance platforms across fintech, blockchain, and real-time trading. Deep expertise in Rust, TypeScript, and React, with a track record of shipping production systems — centralized exchanges, DeFi protocols, and scalable web platforms. Currently leading an 8-engineer team delivering a low-latency CEX. Combines hands-on architecture with team leadership, mentorship, and engineering-process ownership.

TECHNICAL SKILLS

Languages: Rust, TypeScript, JavaScript, Solidity, Python, FunC

Frontend: React 19, Next.js, SvelteKit, Vite, Tailwind CSS, TanStack Query, Zustand, real-time UI, performance optimization

Backend & Blockchain: Node.js, Axum (Rust), REST APIs, GraphQL, microservices, Solana, TON, NEAR, Ethereum, ethers v6, smart contracts

AI & LLM: OpenAI & Claude APIs, LLM integration, RAG, vector databases, Hugging Face Transformers, AI agents, prompt engineering

Databases: PostgreSQL, MySQL, Drizzle ORM, Neon

Cloud & DevOps: AWS, Docker, GitHub Actions, Grafana

Testing: Vitest, Playwright, Synpress, Cypress, Selenium, Gherkin

Architecture: Feature-Sliced Design, monorepos (pnpm), modular SDK / transport layers

Leadership: Team leadership, mentorship, cross-functional collaboration, engineering process improvement

Tools: JIRA, Trello, Miro, Notion, ClickUp

Methodologies: Agile, Scrum, Kanban

Languages (spoken): English — Fluent; Belarusian, Russian — Native; Spanish, French — Intermediate; Portuguese — Basic

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer & Team Lead — Cozy Ventures · World.inc CEX (client)

Jun 2025

- Lead an 8-engineer cross-functional team (5 frontend, 3 smart-contract), defining architecture and development standards for a Web3 trading platform (perpetuals, spot, lending).
- Architected a TypeScript monorepo with a custom in-house blockchain SDK / transport layer and Feature-Sliced Design.
- Built real-time market-data infrastructure with high-performance virtualized trading tables and charts (AG Grid, visx, lightweight-charts), one-click trading, and live animated pricing.
- Integrated Solana asset management and trading functionality.

Tech: React 19, TypeScript, Vite 7, TanStack Query, Zustand, Tailwind CSS 4, HeroUI, ethers v6, TypeChain, Rust (WASM), Feature-Sliced Design, pnpm monorepo, AG Grid, visx, lightweight-charts, Vitest, Playwright, Synpress, MegaETH

Core Contributor / Engineering Lead — EVAA Protocol

Feb 2023

- Engineered the MVP of the first lending protocol on the TON blockchain in one month.

- Developed Rust-based smart contracts enabling cross-chain functionality with Solana.
- Built frontend across desktop, mobile, and Telegram, plus three Telegram bots to improve user experience.
- Reduced application load time by 63% through targeted frontend and backend performance optimization.
- Drove a 30% increase in user engagement during a one-month hackathon period.

Tech: Rust, FunC, TON (TON Connect, @ton/ton), Solana, TypeScript, React, Next.js, Node.js, TanStack Query, Telegram Mini Apps & Bot API, DeFi

Smart Contract / Full-Stack Developer — Supa Doge

Feb 2022

- Developed smart contracts on the NEAR blockchain, integrated with an existing gaming backend.
- Proposed and built Solidity contracts integrating the gaming backend with Ethereum.
- Partnered with designers and stakeholders to prioritize features, increasing development throughput by 28%.
- Independently delivered a production-ready MVP frontend within three weeks.

Tech: Rust (near-sdk-rs), NEAR Protocol, Solidity, Ethereum, Hardhat, ethers.js, Next.js, React, TypeScript, Node.js

Full-Stack Developer — NRboom

Feb 2021

- Delivered a working prototype in two months: a back office plus a high-load backend scoring neuroheadset signal data.
- Designed an API for the four-person AI team that sped up their development by ~20%.
- Built and maintained the frontend application.

Tech: TypeScript, Node.js, React, Python, REST APIs, WebSockets, PostgreSQL, Docker

Full-Stack Developer / TAT Engineer — EPAM Systems

Aug 2019

- Delivered three enterprise projects, collaborating with product management to enhance user experience.
- Streamlined team development processes and improved CI/CD pipelines.
- Built and maintained an automated-testing framework.
- Mentored 10 junior developers and 7 QA engineers, several of whom were promoted.

Tech: JavaScript, TypeScript, React, Node.js, Selenium, Cypress, Gherkin, CI/CD (Jenkins), Docker
